You could lose money by investing in the SDIT Government Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time. The yield quotations more closely reflect the current earnings of Money Market Funds than total return quotations.

Performance prior to the inception of the Class Y shares is that of the class with the earliest inception date as listed for each fund.

The performance data shown is past performance. Past performance is no guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-800-DIAL-SEI. Expenses after waivers reflect any voluntary and contractual waivers.

Important Information

To determine if the fund(s) are an appropriate investment for you, carefully consider the fund's investment objectives, risk factors and charges and expenses before investing. This and other information can be found in the Fund's full and summary prospectus, which may be obtained by calling 1-800-DIAL-SEI. Please read it carefully before investing.

Expenses after waivers reflect any voluntary and contractual waivers. Fee waivers for SIT Emerging Markets Equity are contractual and in effect until 1/31/25. The expenses for the Government Fund reflect contractual waivers in effect until 5/31/24. Voluntary waivers may be discontinued at any time.

SEI Investments Management Corporation is the adviser to the SEI funds, which are distributed by SEI Investments Distribution Co (SIDCO). SIMC and SIDCO are wholly owned subsidiaries of SEI Investments Company.

For those SEI Funds which employ the 'manager of managers' structure, SEI Investments Management Corporation has the ultimate responsibility for the investment performance of the Fund due to its responsibility to oversee the sub-advisers and recommend their hiring, termination and replacement.

There are risks involved with investing, including loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Bonds and bond funds will decrease in value as interest rates rise. High yield bonds involve greater risks of default or downgrade and are more volatile than investment grade securities, due to the speculative nature of their investments.

Multi-Asset Funds: Investing in Multi-Asset Funds is subject to the risks of the underlying funds. Asset allocation may not protect against market risk. Due to their investment strategies, the Funds may buy and sell securities frequently. The use of leverage can amplify the effects of market volatility on the Fund's share price and may also cause the Fund to liquidate portfolio positions when it would not otherwise be advantageous to do so in order to satisfy its obligations.

Dynamic Asset Allocation Fund: Due to its investment strategies, the Fund may buy and sell securities frequently. The use of leverage can amplify the effects of market volatility on the Fund's share price and may also cause the Fund to liquidate portfolio positions when it would not otherwise be advantageous to do so in order to satisfy its obligations. Commodity-linked investments and derivatives may be more volatile and less liquid than direct investments in the underlying commodities themselves. Commodity-related equity returns can also be affected by the issuer's financial structure or the performance of unrelated businesses. The Fund's use of futures contracts, forward contracts, options and swaps is subject to market risk, leverage risk, correlation risk and liquidity risk. With short sales, you risk paying more for a security than you received from its sale. Short sales losses are potentially unlimited and the expense involved with the shorting strategy may negatively impact the performance of the fund.

For those SEI Funds which employ the 'manager of managers' structure, SIMC has ultimate responsibility for the investment performance of the Funds due to its responsibility to oversee the sub-advisers and recommend their hiring, termination and replacement.
