

# Private Client Conservative (Class Y)

Fact Sheet / September 30, 2023

SEI New ways.  
New answers.®

## Investment Strategy

The Private Client Conservative Strategy supports investment goals that seek growth while managing risk of loss. The Strategy's assets are invested in one or more underlying SEI Funds that primarily hold U.S. short-term investment-grade fixed income securities, including mortgage-backed securities. The Strategy invests to a lesser extent in underlying SEI Funds that primarily hold U.S. and/or foreign non-investment-grade fixed-income securities, common stocks and securities of real estate companies.

Strategy expense ratio: 0.58%\*

## Investment Philosophy and Process

SEI uses a goals-based approach to investing that combines both traditional finance and behavioral theory. The selection of investment styles for a particular portfolio is guided by investor goals and other constraints or preferences (e.g., risk/return requirements or tax implications). From an asset allocation perspective, portfolio weights are determined through a mix of quantitative (such as statistics) and qualitative (such as potential asset-class behavior) analysis. This blend of analysis is designed to result in asset allocation portfolios that are more diversified than those derived from a purely quantitative, portfolio-optimization-based approach and may provide a better opportunity for success.

## Private Client Strategies

The SEI Private Client Strategies were developed on a foundation of long-term capital market assumptions and overlay the tenets of behavioral finance to account for the role of human emotion in determining the path of capital markets. These strategies have the ability to update periodically to incorporate changes in SEI's ongoing capital market research. The strategies make use of a full complement of SEI mutual funds allowing them to provide high levels of diversification. The strategies range from 100% fixed income through 100% equity providing solutions for a multitude of investor circumstances and are available in both Tax-Managed and Non Tax-Managed versions.

## Top Strategy Allocations

## Fund Name

- SIMT Multi-Asset Capital Stability
- SDIT Short-Duration Government
- SIMT Core Fixed Income
- SIMT Global Managed Volatility
- SIMT Conservative Income
- SIMT Multi-Asset Income
- SIMT U.S. Managed Volatility
- SIMT Multi-Asset Inflation Managed
- SDIT Ultra Short Duration Bond
- SIMT Real Return

## Investment Objective

Calendar Year Returns (%)	2022	2021	2020	2019	2018	2017	2016	2015	2014	2013
Strategy	-5.66	4.57	3.53	9.62	-1.46	5.56	4.46	-0.24	3.37	3.96

Class Y, Inception date: Jul 31, 2006, Launched: Jan 1, 2016

*Prior to the Class Y Private Client Strategies launch, performance links to the performance of the Class F Private Client Strategies. Past performance does not guarantee future results. Current performance may be higher or lower. The principal value and investment return will fluctuate so that shares, when redeemed, may be worth more or less than their original value. See Performance Information section for important information on this calculation.*

Performance assumes investment at the beginning of the period indicated and includes reinvestment of dividends and other earnings. It reflects all SEI-recommended reallocations and changes among the funds, including changes in investment managers and funds included in the strategy. Information on allocations among funds, reallocations and strategy changes is available upon request. Strategy performance shown is hypothetical and not meant to represent any individual client account.

**For Financial Intermediary use only, not for retail distribution**

## Asset Allocation Weights

The Portfolio allocation weights are intended to illustrate the strategy's exposure to certain asset classes. The strategy's underlying funds are generally actively managed and the asset classes used, and the strategy's allocations between asset classes, will be determined based on SEI Investments Management Corporation's views.

<sup>1</sup> Because LSV is an affiliate of SEI, a Fund's shareholders would have to approve the hiring of LSV.

<sup>2</sup> Columbia Management Investment Advisers, LLC ("Columbia") manages a wholly owned subsidiary of the Fund. Columbia has delegated certain of its duties to Threadneedle International Ltd. as a sub-adviser.

<sup>3</sup> Credit Suisse Asset Management, LLC manages a wholly-owned subsidiary of the Fund.

The money managers listed are subject to the Fund's board approval. Subject to the approval of the Funds' Board of Trustees, SEI has the right to hire or terminate a money manager within an SEI fund at any time and without shareholder vote.

## Glossary and Disclosures

\* Strategy expense ratios proportionally reflect the underlying funds' expense ratios after contractual and voluntary fee waivers. Waivers may be discontinued at any time. The expense ratio does not reflect fees charged for any advisory service provided by your financial intermediary. You will be paying a separate fee for your financial intermediary's advisory services that is being reflected in the net of fees presentation of performance in this fact sheet.

**Performance Disclosure:** Strategy returns do not represent actual trading and may not reflect the impact that material economic and market factors might have had on decision-making if SEI Investments Management Corporation (SIMC) were managing client assets. Performance assumes monthly rebalancing of the underlying funds back to their respective assigned allocations which may vary from the actual implementation date and rebalancing process in client accounts. Strategy performance shown is not meant to represent any individual client account. Actual client results may vary substantially.

**Risk Disclosure:** There are risks involved with investing including loss of principal. There is no assurance that the objectives of any strategy or fund will be achieved or will be successful. No investment strategy, including diversification, can protect against market risk or loss. No Investment Strategy or management technique can guarantee returns or eliminate risk in any market environment. Diversification does not protect against market risk or loss.

The following risks may apply to the underlying investments:

- › **International:** International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations.
- › **Small Cap:** Narrowly focused investments and smaller companies typically exhibit higher volatility.
- › **Emerging Markets:** Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume.
- › **Bonds:** Bonds and bond funds are subject to interest rate risk and will decline in value as interest rates rise.
- › **High Yield Bonds:** High-yield securities may be more volatile, be subject to greater levels of credit or default risk and may be less liquid and more difficult to sell at an advantageous time or price to value than higher-rated securities of similar maturity.
- › **TIPS:** TIPS can provide investors a hedge against inflation, as the inflation adjustment feature helps preserve the purchasing power of the investment. Because of this inflation adjustment feature, inflation protected bonds typically have lower yields than conventional fixed rate bonds.
- › **Multi-Asset Funds:** Investing in Multi-Asset Funds is subject to the risks of the underlying funds. Asset allocation may not protect against market risk. Due to their investment strategies, the Funds may buy and sell securities frequently. The use of leverage can amplify the effects of market volatility on the Fund's share price and may also cause the Fund to liquidate portfolio positions when it would not otherwise be advantageous to do so in order to satisfy its obligations.

Information provided by SEI Investments Management Corporation (SIMC), a wholly owned subsidiary of SEI Investments Company. SIMC provides non-discretionary asset management services in the form of models to financial intermediaries and is solely responsible for the fund selection and portfolio construction. Financial intermediaries may or may not utilize SIMC's model investment recommendations when advising clients. Neither SEI nor its subsidiaries are affiliated with your firm. For those SEI Funds which employ the "manager of managers" structure, SIMC has the ultimate responsibility of the investment performance for the fund due to its responsibility to oversee the sub-advisors and recommend their hiring, termination and replacement.
