Past performance is no guarantee of future results. Current performance may be lower or higher. Investment return and principal value of an investment will fluctuate so that an investor's shares on redemption may be worth more or less than the original cost. Please see additional information on strategy performance at end.

Private Client Strategies - Class Y

Performance Report
As of November 30, 2023

SEI New ways.
New answers.®

Important Information

The inception date provided is for the Class F version of the strategies. Performance prior to 1/1/16, the inception date of the Class Y Strategies, is that of the Class F Strategies.

SEI Investments Management Corporation (SIMC) is the investment adviser to the strategies and is a wholly owned subsidiary of SEI Investments Company.

Investing involves risk including possible loss of principal. Diversification may not protect against market risk. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Bonds and bond funds are subject to interest rate risk and will decline in value as interest rates rise.

Performance information assumes reinvestment of all dividends and capital gains. Asset Allocation Strategy performance assumes investment at the beginning of the period indicated and reflects all recommended reallocations and changes among the Funds, including changes in investment managers and Funds included in the Strategy. Information on allocations among Funds, reallocations, and Strategy changes is available upon request. Strategy returns do not represent actual trading and may not reflect the impact that material economic and market factors might have had on decision making if SIMC were managing client assets. Performance assumes monthly rebalancing of the underlying funds back to their respective assigned allocations which may vary from the actual implementation date and rebalancing process in client accounts. Performance shown is not meant to represent any individual client account performance. Actual client results may vary substantially.

Strategy performance shown is net of all fees charged by SEI. Performance information as shown is net of all underlying mutual fund fees and expenses, but does not include any charges or fees which may or may not be imposed by an investor's financial advisor which will reduce performance returns. For example, on an account charged 1% by a financial advisor with a stated annual return (net of mutual fund fees) of 10%, the net total return before taxes would be reduced from 10% to 9%. A ten year investment of \$100,000 at 10% would grow to \$259,400 and at 9%, to \$236,700 before taxes.

This report must be accompanied by the fact sheets for all Strategies shown.
